

TRENDX PRO

TRENDX PRO

MODERN AND SIMPLICITY

Every form of work needs the right system furniture to support you in a dynamic working environment to facilitate communication, exchange of information and development of new ideas. TrendX Pro system precisely fits into any workplace to support different applications, such as individual work, collaborative task, brainstorming and meeting. It offers a simple, practical and flexible solution to revolutionise office layout.

TrendX Pro is a bench desking system in bridge structure - a 50 mm by 50 mm tubular bridge shaped leg connects with table beam. Its durable structure provides a sturdy support for table top and is ideal for modular installation. A minor gap between table top and leg structure creates a floating effect which reflects the lightness impression in any contemporary office environment.

TrendX Pro system is available in aluminium and metal structure. TrendX Pro aluminium leg features a chrome aluminium die-cast connector at its 90° leg joint and the 5 mm groove along the leg complements its contemporary design. The entire aluminium leg construction is completed with 50 mm x 28 mm aluminium beam. On the other hand, TrendX Pro metal leg presents a clean cut lines and simplicity profile with 50 mm x 25 mm metal beam.
